

COST ACROSS WG meeting in Bilbao, 13 October 2016

(Draft Programme)

Technical presentations

- 1. Towards a Framework for Comparing Application-Network Interaction Mechanisms**
Susanna Schwarzmann, Thomas Zinner, Ognjen Dobrijevic
- 2. Transport protocol performance over cellular access: adaptability issues and future steps**
Eneko Atxutegi, Ake Arvidsson
- 3. Smart operation of the future power distribution grid**
Poul Heegaart
- 4. On QoE Metrics and QoE Fairness for Network & Traffic Management**
Tobias Hossfeld, Lea Skorin-Kapov, Poul Heegaard
- 5. Analysis and Measurement of BitTorrent**
Andri Lareida
- 6. Energy aware server with setup delay: analysis and optimization**
Misikir Gebrehiwot and Samuli Aalto
- 7. A Mobile IoT Device Simulator for IoT Cloud Systems**
Atilla Kertesz
- 8. Evaluation of new efficient web caching strategies**
Gerhard Hasslinger
- 9. Reference model for resource distribution in Cloud Federation**
Wojtek Burakowski
- 10. Modeling fault behavior in evolving complex open software environments**
Tihana Grbac
- 11. Generalized Aggregation Functions and Quality Indicators in Overall Telecommunication Network Models**
Stoyan Poryazov, Emilia Saranova
